

Power failure during restore operation of Windows to Linux upgrade

Problem Summary	Power failure during restore operation of Windows to Linux upgrade.
Error Message	None.
Possible Cause	Power failure during restore operation of Windows to Linux upgrade.
Recommended Action	If restore operation fails due to power outage during Phase 0 or Phase 1, then when the system comes up again, restore process can be started from beginning. If restore operation fails due to power outage during Phase 2, then when the system comes up again, Phase 2 will start automatically. Status of the same can be checked from Tools->Windows Upgrade.
Release	Release 8.0(1)
Associated CDETS #	None.
