

## Provider becomes IN\_SERVICE immediately

<b>Problem Summary</b>	When creating as ASR/TTS provider, its status becomes IN_SERVICE immediately. This happens even before creating any servers for it.
<b>Error Message</b>	The ASR/TTS provider status incorrectly shows <i>IN_SERVICE</i> .
<b>Possible Cause</b>	After deleting a provider and all the servers along with it, if a new provider is created, it continues to use the previous configuration and does not get refreshed.
<b>Recommended Action</b>	Click <b>Refresh</b> or <b>Refresh All</b> for that provider. This will cause the status of the provider to go OUT_OF_SERVICE as expected.
<b>Release</b>	Release 7.0(1)
<b>Associated CDETS #</b>	None.
