

Replication Failure seen in the DB control center Appadmin page

Problem Summary	Replication Failure seen in the DB control center Appadmin page. OR else there is only publication snapshot agent present for any of the datastore component in the DB Control Center Page.
Error Message	
Possible Cause	
Recommended Action	<p>1. Go to DB control Center->Publisher Activation page from the Appadmin.</p> <p>2. Select the Publication Snapshot Agent of the datastore whose replication has been failed. 3. Click Reset Publication.</p> <p>If it does not work:</p> <p>Open Appadmin control Center->Component Activation and deactivate the node2 datastore component whose replication has been broken. Try component activation again.</p>
