

Reporting: Data Source Failover

Problem Summary	The data source from which a report retrieves information becomes unavailable (for example, if the HDS on Unified ICM Side A is down).
Error Message	Not applicable.
Possible Cause	The system cannot find the license file or the license file cannot be opened.
Recommended Action	<ol style="list-style-type: none"> 1. Select Administrative > Data Sources to open the Data Sources window. 2. Select the data source and click Edit to open the Edit Data Source window. 3. Edit the Server (IP or DNS: port) field to enter an IP address for an available data source. 4. Click Test Connection.
Releases	Release 7.5(x)
Associated CDETS #	None
