

## Reporting:\_SQL\_Validation\_for\_Unified\_IC

Reporting: SQL Validation for Unified IC

<b>Problem Summary</b>	Your SQL validation fails when you create or modify a report in Report Wizard (Release 7.5) or Report Definition (Release 8.0).
<b>Error Message</b>	Invalid Query
<b>Possible Cause</b>	You have used an insert or an update query. You have not included field names.
<b>.Recommended Action</b>	Unified IC expects select statements with defined fields. Unified IC parses the named fields from the select statement and presents them to users in the report.
<b>Release</b>	Releases 7.5(x) and 8.0(1).
<b>Associated CDETS #</b>	None
