

Reporting:_SQL_Validation_for_Unified_IC

Reporting: SQL Validation for Unified IC

Problem Summary	Your SQL validation fails when you create or modify a report in Report Wizard (Release 7.5) or Report Definition (Release 8.0).
Error Message	Invalid Query
Possible Cause	You have used an insert or an update query. You have not included field names.
.Recommended Action	Unified IC expects select statements with defined fields. Unified IC parses the named fields from the select statement and presents them to users in the report.
Release	Releases 7.5(x) and 8.0(1).
Associated CDETS #	None
