

## Queries Timing Out Under Load

<b>Problem Summary</b>	Queries are timing out under load.
<b>Error Message</b>	No message displays.
<b>Possible Cause</b>	This is typical response when the database is under heavy load.
<b>Recommended Action</b>	<p>Consider querying the database when the database is not under heavy load.</p> <p>You might also try to reduce contention with active processes using the following statements:</p> <ul style="list-style-type: none"> <li>• SET LOCK MODE WAIT 30 the WAIT &lt;seconds&gt; option causes the session to suspend the process until the lock releases or until the waiting period ends.</li> <li>• SET ISOLATION DIRTY READ this option instructs the session not to place locks on the data when it is attempting to read, and potentially read data ignoring existing locks.</li> </ul>
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
