

## Starting Informix Database Causes Client Locale Not Set Error

<b>Problem Summary</b>	When starting Informix from the command prompt generates an error message.
<b>Error Message</b>	CLIENT_LOCALE is not set. The database cannot be accessed.
<b>Possible Cause</b>	The database was tried to be started from the command line instead of the Services control panel.
<b>Recommended Action</b>	Verify that the database has stopped. Go to the Services Control Panel and start the Informix service with the appended database name.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
