

## Reports: Import errors

<b>Problem Summary</b>	You encounter error while importing a report.
<b>Error Message</b>	Various
<b>Possible Cause</b>	<p>There are several import errors:</p> <ol style="list-style-type: none"> <li>1. Corrupted XML file results in XML Error while importing.</li> <li>2. <i>Access denied</i> error when the imported report has a report definition and/or a value list that do not already exist on the system.</li> <li>3. Data source error</li> </ol>
<b>Recommended Action</b>	<p>Actions to take...</p> <p>For 1. Open the XML file in the browser to make sure it is correct.</p> <p>For 2. The user who imports a report must have the User Role and permissions to created a Report Definition and/or a Value List.</p> <p>For 3. An imported report will create a Report Definition. If the data source for that Report Definition is not online or if the SQL statement in the Report Definition is invalid, the report import fails with a data source error.</p>
