

Restore error in HA deployment when backup and restore is performed on different nodes

Problem Summary	A backup from a tape drive fails at 98% with an error message.
Error Message	Please make sure that the Tape drive is connected to the machine and verify if the tape is properly inserted.
Possible Cause	Tape drive is connected to one node, but the backup was taken from the other node.
Recommended Action	Perform backup from the node on which the tape drive is connected.
Release	Release 7.0(1)
Associated CDETS #	None.
