

## Restore error in HA deployment when backup and restore is performed on different nodes

<b>Problem Summary</b>	A backup from a tape drive fails at 98% with an error message.
<b>Error Message</b>	Please make sure that the Tape drive is connected to the machine and verify if the tape is properly inserted.
<b>Possible Cause</b>	Tape drive is connected to one node, but the backup was taken from the other node.
<b>Recommended Action</b>	Perform backup from the node on which the tape drive is connected.
<b>Release</b>	Release 7.0(1)
<b>Associated CDETS #</b>	None.
