

Restore error in HA deployment when backup and restore is performed on different nodes

| | |
|---------------------------|---|
| Problem Summary | A backup from a tape drive fails at 98% with an error message. |
| Error Message | Please make sure that the Tape drive is connected to the machine and verify if the tape is properly inserted. |
| Possible Cause | Tape drive is connected to one node, but the backup was taken from the other node. |
| Recommended Action | Perform backup from the node on which the tape drive is connected. |
| Release | Release 7.0(1) |
| Associated CDETS # | None. |
