

**Restore error in HA deployment when tape drive moved**

<b>Problem Summary</b>	When using a tape device in an HA deployment and clicking Restore Now, an error message is displayed.
<b>Error Message</b>	Unable to perform Restore, please check logs for more details.
<b>Possible Cause</b>	In an HA deployment, a backup is performed on a tape drive that is connected to one node. Then the tape drive is moved to the other node and the restore operation is performed on that node.
<b>Recommended Action</b>	Perform the restore operation on the node on which the backup was performed.
<b>Release</b>	Release 7.0(1)
<b>Associated CDETS #</b>	None.
