

**MTP Resource Allocated Even Though MTP is Disabled**

<b>Problem Summary</b>	Media Transfer Protocol (MTP) Resource is allocated for each call coming into SIP trunk even though MTP disabled is selected on the trunk.
<b>Error Message</b>	None.
<b>Possible Cause</b>	Failure to negotiate DTMF method occurs for the call, according to the DTMF method supported by the endpoints involved in the call.
<b>Recommended Action</b>	Set the endpoints of the call to negotiate the same DTMF method, that is RFC2833 for Unified CVP calls. <b>Note:</b> Out of Band (OOB) Key Press Markup Language (KPML) is not supported for the Unified CVP 4.0 and 4.1 releases.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
