

SIP Call Fails with 404 Not Found Error Message

Problem Summary	Sending call to Unified CM with a domain name like an SRV cluster name fails with 404 not found rejections.
Error Message	404 Not Found.
Possible Cause	The cluster fully qualified domain name (FQDN) is missing.
Recommended Action	Go to System -> Enterprise Parameter -> Cluster Fully Qualified Domain Name on the Unified CM and add the Cluster FQDN.
Release	Release 7.0(2)
Associated CDETS #	None.
