

**SIP Calls Experience Long Delay or Fast Busy**

<b>Problem Summary</b>	During the making of a SIP call, the caller experiences a long delay or hears a fast busy condition.
<b>Error Message</b>	None.
<b>Possible Cause</b>	If the calls go through, but there is a long delay or a fast busy, it could be the result of a Domain Name Server (DNS) problem in the proxy.
<b>Recommended Action</b>	Verify that the correct nameserver and domain information was configured in the /etc/resolv.conf file. If DNS is not being used, then remove any entries in that file.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
