

## Configure JAWS to recognize and announce highlighted text

<b>Problem Summary</b>	In SocialMiner release 9.0(1), JAWS does not announce highlighted text.
<b>Error Message</b>	None
<b>Possible Cause</b>	JAWS is not configured to announce highlighted text.
<b>Recommended Action</b>	<p>Note: JAWS version 13 is supported using Firefox 12 on Windows XP.</p> <p>Instructions on how to configure JAWS to recognize highlighted text:</p> <ol style="list-style-type: none"> <li>1) On the JAWS Utilities tab, open the ?JAWS Settings Center?.</li> <li>2) Expand the ?Speech and Sounds Schemes? menu and click on the ?Active Speech and Sounds Scheme? option.</li> <li>3) Select the scheme that you?ll be using or create a new scheme. Either way, click the ?Modify Schemes?? button.</li> <li>4) In the ?Modify Schemes? dialog box, select either the scheme you want to modify (?Edit Selected Scheme?) or create a new one (?Create New Scheme?).</li> <li>5) In the Edit Scheme dialog, open the ?Attributes? tab.</li> <li>6) If ?Highlight? is not in this list, add it by clicking on the ?Add? button and checking the ?Highlight? checkbox. Click ?Next &gt;? to select the attribute and click the ?Speak Item? radio button. Click the ?Next &gt;? button and select ?MessageVoice? in the ?Select Voice Alias? dialog. Click ?Next &gt;? to get to the ?Optional Text? dialog. Click the ?Finish? button. If you created a new scheme, you?ll need to save this scheme and make sure this scheme is set in the ?Select Scheme:? drop-down list.</li> <li>7) Click ?OK? to close these open dialogs and exit the ?JAWS Settings Center?.</li> </ol>
<b>Release</b>	9.0(x) only
