Runtime Server Status is not green and Lock Timeout Expired error received

Problem Summary	You see a non-green icon next to Runtime Server Status in the System Administration gadget under the Administration tab.
Error Message	The following error messages are present in the runtime logs: • Caused by: java.sql.SQLException: Could not position within a table (table name). • Caused by: java.sql.SQLException: ISAM error: Lock Timeout Expired.
Possible Cause	Data from one of the informix tables can't be properly accessed because of a database lock.
Recommended Action	• Log in to the console of the SocialMiner server as the admin user configured at installation-time. • List the services and their statuses by typing **utils service list** in the command line. • Restart SocialMiner Runtime service by typing **utils service restart SocialMiner Runtime**.
