

## Potential delay during DNS lookup

<b>Problem Summary</b>	When SocialMiner uses DNS to validate a hostname, it relies on timely DNS resolution.
<b>Error Message</b>	None. Logs tagged with "MR_SERVER_SOCKET_DNS_WARN" identify DNS lookup issues.
<b>Possible Cause</b>	If resolution does not occur in a timely fashion (within 1 second for each lookup), connections may fail.
<b>Recommended Action</b>	Ensure that your network configuration is robust enough to ensure timely DNS response and appropriate error handling for DNS failures.
<b>Release</b>	Release 9.0(x), 10.0(1), 10.5(1), 10.6(1)
<b>Associated CDETS #</b>	None
