

Potential delay during DNS lookup

Problem Summary	When SocialMiner uses DNS to validate a hostname, it relies on timely DNS resolution.
Error Message	None. Logs tagged with "MR_SERVER_SOCKET_DNS_WARN" identify DNS lookup issues.
Possible Cause	If resolution does not occur in a timely fashion (within 1 second for each lookup), connections may fail.
Recommended Action	Ensure that your network configuration is robust enough to ensure timely DNS response and appropriate error handling for DNS failures.
Release	Release 9.0(x), 10.0(1), 10.5(1), 10.6(1)
Associated CDETS #	None
