

SocialMiner Feeds - Network Issues

Problem Summary	Your feed renders in the browser but does not work in SocialMiner.
Error Message	Various
Possible Cause	It is possible that you have a network topology issue. For example, if your SocialMiner system is outside the corporate firewall, it may not be able to access a intranet site even though the site renders in your browser.
Recommended Action	See design guidance, deployment models in the SocialMiner User Guide.
Release	Release 9.0(x), 10.0(1), 10.5(1), 10.6(1)
Associated CETS #	None
