

SocialMiner Installation - Two SocialMiner Applications on one Server, Setting CPU Reservation

Problem Summary	You are deploying two SocialMiner applications on one VMWare server.
Error Message	You cannot start the second SocialMiner. You see an error about insufficient CPU resources.
Possible Cause	You are exceeding the CPU capacity.
Recommended Action	<ol style="list-style-type: none"> 1. Open the vSphere client and point to the host for the SocialMiner systems. 2. Right click on the VM you want to modify and click Edit Virtual Machine Settings. 3. Click the Resources tab. 4. Make sure CPU is highlighted. 5. Change the CPU Reservation to 8000MHz by dragging the arrow or by typing <i>8000</i>.
Release	Release 9.0(x), 10.0(1), 10.5(1), 10.6(1)
Associated CDETS #	None
