

SocialMiner User Interface - Common Errors

Problem Summary	You see a numerical error code on the screen and are not sure what it means.
Error Message	Various
Possible Cause	Various
Recommended Action	<p>All errors are returned as HTTP 1.1 Status Codes. http://www.w3.org/Protocols/rfc2616/rfc2616-sec10.html</p> <p>The common codes used by SocialMiner are:</p> <ul style="list-style-type: none"> • 200 OK: Success • 201 Created: The requested item was created. • 202 Accepted: The request was accepted. Generally, a URL is provided to obtain additional details, for example, for polling the OAuth status. • 400 Bad Request: The request is invalid. See the information returned in the ApiErrors message for more details. • 401 Unauthorized: The authentication credentials were not supplied or were incorrect. • 404 Not Found: The URI requested does not exist on the server. • 500 Internal Server Error: Something broke on the server. Submit a post to the SocialMiner Forums explaining what you did and the server's response.
