

## ICM Services intermittently fail to start when set to Automatic

<b>Problem Summary</b>	The system is in an Active Directory domain and was just rebooted. Some ICM Services do not start correctly.
<b>Error Message</b>	None
<b>Possible Cause</b>	ICM Services do not start correctly due to login failure.
<b>Recommended Action</b>	<p>There are two possible workarounds for this problem:</p> <ol style="list-style-type: none"> <li>1. Open the ICM Service Control or the Windows Services Control and manually start the services that failed to start.</li> <li>2. Remove the system from the domain, then re-add the system from the domain. All ICM services should start correctly.</li> </ol>
<b>Release</b>	Release 7.5(1) and 8.0
<b>Associated CDETS #</b>	None.
