

**Setup impacted by domain problems**

<b>Problem Summary</b>	Setup takes a long time to complete and appears not to be making any progress. Avoid exiting prematurely and wait for setup to complete.
<b>Error Message</b>	None
<b>Possible Cause</b>	If setup is run on a component requiring a service account, setup can take around 30 minutes to create the account if the domain is not properly configured, or the domain is not functioning properly.
<b>Recommended Action</b>	Let setup complete and do not cancel the operation. Fix any domain problems so that subsequent attempts to run setup will not take as long.
<b>Release</b>	Release 7.5(1) and 8.0
<b>Associated CDETS #</b>	None.
