

Setup impacted by domain problems

Problem Summary	Setup takes a long time to complete and appears not to be making any progress. Avoid exiting prematurely and wait for setup to complete.
Error Message	None
Possible Cause	If setup is run on a component requiring a service account, setup can take around 30 minutes to create the account if the domain is not properly configured, or the domain is not functioning properly.
Recommended Action	Let setup complete and do not cancel the operation. Fix any domain problems so that subsequent attempts to run setup will not take as long.
Release	Release 7.5(1) and 8.0
Associated CDETS #	None.
