

## Switch Version Fails on Pub Even After the Upgrade is Successful

<b>Problem Summary</b>	The user gets a failure message while running switch version on node 1.
<b>Error Message</b>	?Switch version can not be performed as upgrade on node 2 (Subscriber) is either incomplete or not started at all? or ?Cluster Manager Service is either down or clustering is not proper on Publisher.?
<b>Possible Cause</b>	<ul style="list-style-type: none"> <li>• Cluster manager service is not running on both nodes.</li> <li>• Refresh Upgrade is not complete on node 2.</li> </ul>
<b>Recommended Action</b>	<ul style="list-style-type: none"> <li>• Upgrade should be first initiated on node 2. Switch version should be tried only after successfully completing upgrade on node 1.</li> </ul> <p> <b>Note:</b></p> <ul style="list-style-type: none"> <li>• After completing switch version on node 1, the user should perform switch version on node 2.</li> <li>• Restarting the system manually after switch failure is mandatory.</li> <li>• There is no option to initiate upgrade and continue running 9.0(1) immediately after upgrade is done.</li> </ul>
<b>Release</b>	Release 9.0(1)
<b>Associated CDETS #</b>	None
