

**System: Deleting the NTP Server in Cisco Unified OS Administration**

<b>Problem Summary</b>	<p>The Unified IC Administration Console provides access to Cisco Unified OS Administration from the Navigation dropdown, using System Administrator credentials.</p> <p>The OS Administration tool has a menu option for Settings &gt; NTP Servers. From this interface, it is possible to delete NTP server(s) and then add them again. Deleting and then re-adding the NTP Server through the OS Administration interface impacts the date and time shown on reports.</p>
<b>Error Message</b>	None
<b>Possible Cause</b>	Deleting and re-adding NTP Servers.
<b>Recommended Action</b>	<p>Restart the Controller and all Member nodes in the Unified IC Administration interface.</p> <p>To do this, log in to Administration and select Control Center &gt; Device Control.</p>
<b>Release</b>	Release 8.0(1)
<b>Associated CDETS #</b>	None
