

System: Deleting the NTP Server in Cisco Unified OS Administration

Problem Summary	<p>The Unified IC Administration Console provides access to Cisco Unified OS Administration from the Navigation dropdown, using System Administrator credentials.</p> <p>The OS Administration tool has a menu option for Settings > NTP Servers. From this interface, it is possible to delete NTP server(s) and then add them again. Deleting and then re-adding the NTP Server through the OS Administration interface impacts the date and time shown on reports.</p>
Error Message	None
Possible Cause	Deleting and re-adding NTP Servers.
Recommended Action	<p>Restart the Controller and all Member nodes in the Unified IC Administration interface.</p> <p>To do this, log in to Administration and select Control Center > Device Control.</p>
Release	Release 8.0(1)
Associated CDETS #	None
