

System: Purge the CUIC Database

Problem Summary	How do you purge the CUIC database?
Error Message	None.
Possible Cause	Some CUIC tables grow very large. Follow this procedure to schedule a job that truncates seven tables that tend to grow. Do this to constrain the database size.
Recommended Action	<ol style="list-style-type: none"> 1. Open Microsoft SQL Server Management Studio. 2. Connect to the server where the CUIC database is installed. 3. Expand "SQL Server Agent". 4. Right-click "Jobs"; then click "New Job". 5. On the General tab: <ul style="list-style-type: none"> ◆ Name : Enter a name such as 'Purge tables from CUIC database' ◆ Category : Database Maintenance 6. Click OK. 7. Select Steps in the left panel 8. Click New. <ul style="list-style-type: none"> ◆ Step Name : Enter a name such as 'Purge Large Tables' ◆ Type: Transact-SQL script (T-SQL) ◆ Database : Select the CUIC database ◆ Commands: Enter these commands <ul style="list-style-type: none"> ◇ TRUNCATE TABLE AA_DataProcessingInfo ◇ TRUNCATE TABLE AA_ErrorLog ◇ TRUNCATE TABLE AA_LoadEvents ◇ TRUNCATE TABLE AA_ProfilerData ◇ TRUNCATE TABLE AA_ReportViews ◇ TRUNCATE TABLE AA_TracingData ◇ TRUNCATE TABLE AA_UserLog 9. Select OK. 10. Select Schedules in the left panel. 11. Click new. <ul style="list-style-type: none"> ◆ Name : Daily ◆ Schedule type : Recurring ◆ Frequency : Daily ◆ Daily Frequency : Occurs once at : 1:00 AM 12. Select OK. 13. Select OK.
Release	Release 7.5(2).
Associated CDETS #	None.
