

Talk:Cisco_Unified_Presence,_Release_7.x_--_Installation_and_Upgrade

When I browsed to the Install & Upgrade for Presence on the Cisco.com support website, it dumps me to the DOCWIKI for Cisco. I can read through the documentation but I do not see a way to print it or a PDF to save.....VERY INCONVENIENT!

There are a few ways you can get a print-friendly version. In the left-hand navigation, under toolbox, there are options to view a printable copy of the page or to print a PDF. If you want a PDF made up of multiple articles, there are steps described in the [Generating a PDF of Cisco Unified Presence Book Lists](#) article.

I hope this helps! [Pzimmerm](#) 01:59, 13 March 2010 (UTC)
