

Talk:Internetnetwork_Design_Guide_--_Designing_ISDN_Internetnetworks

Please verify that the formatting of the CLI commands are correct. The Wiki page version does not display properly, however when I copy and paste to this discussion area it looks correct.

kdt-776> **sh status**

AS5200-1#**sh isdn service**

KDT-5200#**sh user**

thanks tdayans@cisco.com

The problem on the wiki page is that the quotes are being used inside "pre" tags, which basically mean don't apply wiki formatting to them. When you copied them over to the discussion page, they weren't inside pre tags, so the formatting was applied properly. --Fenton 20:53, 24 August 2009 (UTC)
