

## Talk:License\_Activation\_for\_Cisco\_UC\_on\_UCS

Hello to all , My name is Carlos Lima

When trying to register a license for an ESXi 4.1 in a UCS C210-M2 i have the following error:  
"license error: 5

diagnostic message: license is not valid for this product "

I received from Cisco a license with 15 characters called R-VMW-UC-FND (CISCO UC VIRT. FOUNDATION

Do I have to first to register this license elsewhere (in vmware site or something like this)?

Can you help me on this problem?

### **Please update this doc with VMware version 6.0**

VMware 6.0 license for BE6k is available on PUT. Please update this doc so that we can share with customers.

Thanks a lot.
