

## Talk:OVA\_Template\_Details\_for\_Unified\_CM\_Release\_9.0

In 9.1 template specification for 2500 users (reduced HDD footprint) there should be 2 vCPUs:

[http://www.cisco.com/web/software/283088407/97505/cucm\\_9.1\\_vmv7\\_v1.6.ova.README1.txt](http://www.cisco.com/web/software/283088407/97505/cucm_9.1_vmv7_v1.6.ova.README1.txt)

Cisco Unified Communications Manager (CUCM) configuration that supports up to 2500 users per node, 60GB hard disk, maximum 2500 users in CUCM cluster.

- Red Hat Enterprise Linux 5 (32-bit)
- **CPU: 2 vCPU with 800 MHz reservation**
- Memory: 3 GB with 3 GB reservation
- Disk: 1 - 60 GB disk with pre-aligned disk partitions
