

Talk:Shared_Storage_Considerations

To whom it may concern,

I'm not sure if I'm doing this correctly or not and how it really works. However, I would like to report a problem with the link: once you access http://docwiki.cisco.com/wiki/Shared_Storage_Considerations page and you try to click on "Cisco UCS storage certification list" link is not working well, i.e. it redirects you to the wrong part of the web.

Any help/comment is appreciated, Renato
