

Talk:Tested_Reference_Configurations_(TRC)

TRC #1 for C210 M2 states - Dual E5640 (2.53 GHz, 8 total physical cores available to apps)

According to data sheet this is actually..

http://www.cisco.com/en/US/prod/collateral/voicesw/ps6790/ps5748/ps378/solution_overview_c22-597556.html

Cisco UCS C210 M2: Tested reference configuration 1: ? Cisco UCS C210 M2 General-Purpose Rack-Mount Server ? Dual quad-core Intel 2.66-GHz Xeon E5640 processors ? 48-GB RAM ? Ten 146-GB hard drives with Serial Attached SCSI (SAS) expander ? Three motherboard built-in Ethernet ports (2 for network and 1 for Cisco UCS C-Series Integrated Management Controller) ? Four additional Ethernet ports (all for network)

Thanks,

Tim.

Missing Servers ?

The C220M3 & C240M3 aren't listed here yet. I assume they are supported, just that this page hasn't been updated yet ?

Gordon.
