

**Timeout attribute for non-input does not work**

<b>Problem Summary</b>	The timeout attribute when set to 0 causes VXML script execution to wait forever when run with Nuance. Nuance implements a timeout of 0 by waiting indefinitely, which is not compliant with the VXML specification.
<b>Error Message</b>	None.
<b>Possible Cause</b>	Using timeout=0, for example, <pre>&lt;form id="form1"&gt;&lt;property name="timeout" value="0s"/&gt; &lt;field name="myField"&gt; &lt;prompt count="1"&gt; No input expected. Say nothing &lt;/prompt&gt;.</pre>
<b>Recommended Action</b>	Using a timeout of 1 ms will effectively provide the behavior expected by the VXML specification; that is, <pre>&lt;property name="timeout" value="1ms"/&gt;</pre>
<b>Release</b>	Release 7.0(1)
<b>Associated CDETS #</b>	None.
