

## Operation Console (OAMP): FireFox Password Manager Utility Causes Confusion

<b>Problem Summary</b>	A Firefox pop-up may be thrown while we change the password for users in reporting server.
<b>Error Message</b>	None, but a Firefox pop-up appears asking which user you want to change the password for.
<b>Possible Cause</b>	Firefox password manager settings.
<b>Recommended Action</b>	The pop-up is not a function of the Operations Console. The pop-up is asking if you want to change the password saved by Firefox for an associated username. Any action you take in regards to the Firefox pop-up has no effect on the password used by the Operations Console. However, use of the Firefox Password manager is not supported.
<b>Release</b>	8.0(1)
<b>Associated CDETS #</b>	None.
