

Operation Console (OAMP): FireFox Password Manager Utility Causes Confusion

Problem Summary	A Firefox pop-up may be thrown while we change the password for users in reporting server.
Error Message	None, but a Firefox pop-up appears asking which user you want to change the password for.
Possible Cause	Firefox password manager settings.
Recommended Action	The pop-up is not a function of the Operations Console. The pop-up is asking if you want to change the password saved by Firefox for an associated username. Any action you take in regards to the Firefox pop-up has no effect on the password used by the Operations Console. However, use of the Firefox Password manager is not supported.
Release	8.0(1)
Associated CDETS #	None.
