

Activating Call Studio License

Problem Summary	Unable to activate Call Studio
Error Message	Activation Failed
Possible Cause	The license is invalid because either the license feature name is not "CallStudio", the version is less than 8.0, the expiration date has passed, or the hostid does not equal the MAC address of the computer where CallStudio is installed.
Recommended Action	Request a new license from http://www.cisco.com/go/license with the correct feature name, version, expiration date, and MAC address. Then re-activate
Release	CallStudio 8.0(1)
Associated CDETS #	None
