

Diagnostic Portal API response contains error

Problem Summary	Error message in the WSM response.
Error Message	No zeron Diagnostic Portal error code.
Possible Cause	Since WSM needs to get data from the backend, it returns an error message when it is unable to get the required data. The message indicates the reason.
Recommended Action	Make sure all CVP services are running normally. Check CVP device trace files for errors.
Release	8.0(1) and later
Associated CDETS #	None.
