

**Diagnostic Portal API returns partial data**

<b>Problem Summary</b>	Diagnostic Portal API returns partial data
<b>Error Message</b>	Partial data are returned from a WSM query.
<b>Possible Cause</b>	Abnormal status of CVP devices.
<b>Recommended Action</b>	Make sure all CVP services are running normally. For example, if VXML server is down, WSM is not able to get the VXML version data when it handles a get version request.
<b>Release</b>	8.0(1) and later
<b>Associated CDETS #</b>	None.
