

## EMSMON - Monitoring the PIM

<b>Problem Summary</b>	Unable to view logged messages as they appear.
<b>Error Message</b>	None.
<b>Possible Cause</b>	Tracing to the screen is disabled by default in the PG. However, you can use EMSMON to view logged messages as they appear in real time.
<b>Recommended Action</b>	<p>To run EMSMON on the instance icm for PG1A and pim1, issue the command <b>emsmon icm PG1A pim1</b> from a DOS prompt on the server running the PG.</p> <p> <b>Note:</b> The command can be run remotely on any Unified ICM machine by adding a fourth parameter with the PG machine name, for example, <b>emsmon icm PG1A pim1 MYSERVER</b>. This only works if the machines have a trusted relationship within the domain.</p> <p>Close the DOS window or type CTRL-C to exit EMSMON.</p>
<b>Release</b>	Release 7.6(1).
<b>Associated CDETS #</b>	None.
