

EMSMON - Monitoring the PIM

Problem Summary	Unable to view logged messages as they appear.
Error Message	None.
Possible Cause	Tracing to the screen is disabled by default in the PG. However, you can use EMSMON to view logged messages as they appear in real time.
Recommended Action	<p>To run EMSMON on the instance icm for PG1A and pim1, issue the command emsmon icm PG1A pim1 from a DOS prompt on the server running the PG.</p> <p> Note: The command can be run remotely on any Unified ICM machine by adding a fourth parameter with the PG machine name, for example, emsmon icm PG1A pim1 MYSERVER. This only works if the machines have a trusted relationship within the domain.</p> <p>Close the DOS window or type CTRL-C to exit EMSMON.</p>
Release	Release 7.6(1).
Associated CDETS #	None.
