

## Client HDS Replication Cannot Connect to Server Replication

<b>Problem Summary</b>	The Client replication process on the HDS will not connect to the Server Replication process on the Logger.
<b>Error Message</b>	None.
<b>Possible Cause</b>	The IP addresses of the DNS servers may not be correctly specified on the HDS. As a result, the hostname is not resolving to its IP address on the HDS.
<b>Recommended Action</b>	Check how the IP address of the DNS servers is specified on the HDS and correct as needed.
<b>Release</b>	Release 7.5(1) and 8.0
<b>Associated CDETS #</b>	None.
