

Client HDS Replication Cannot Connect to Server Replication

Problem Summary	The Client replication process on the HDS will not connect to the Server Replication process on the Logger.
Error Message	None.
Possible Cause	The IP addresses of the DNS servers may not be correctly specified on the HDS. As a result, the hostname is not resolving to its IP address on the HDS.
Recommended Action	Check how the IP address of the DNS servers is specified on the HDS and correct as needed.
Release	Release 7.5(1) and 8.0
Associated CDETS #	None.
