

Logger Initialization Assert

Problem Summary	During Logger initialization, the process asserts with the following message:
Error Message	"Fail: Assertion failed: syncMsg.UpdateKey == g.checksumInfo.updateKey".
Possible Cause	The Config_Message_Log table in the logger database is empty.
Recommended Action	Open icm\install\sysinit.sqlfile. Copy the insert statement for Config_Message_Log table and run the same on the logger database.
Release	Release 7.5(1) and 8.0
Associated CDETS #	None.
