

## Updating Data with the Serviceability Tool on One Node does not Update Other Nodes

<b>Problem Summary</b>	If you change data on one node, for example the IP Address, by using the Serviceability Tool, the data on all other nodes is not updated.
<b>Error Message</b>	None.
<b>Possible Cause</b>	The Serviceability Tool only operates on one node at a time.
<b>Recommended Action</b>	To change data on more than one node by using the Serviceability Tool, you must operate on them each separately with the Serviceability Tool for the update to happen across a cluster of nodes.
<b>Release</b>	Release 7.0(1)
<b>Associated CDETS #</b>	None.
