Upgrade - Registry and Database Backups

Registry Backups	The SOFTWARE\Cisco Systems, Inc. registry backup made by the Installer just before upgrade is located in C:\Temp\UnifiedICM-CCE-CCHRegSave_ <date>_<time>.reg.txt.</time></date>
	For example, C:\Temp\UnifiedICM-CCE-CCHRegSave_11-30-2009_1422.reg.txt.
Database Backups	The configuration database backup is created by the Installer only if there is enough disk space, and is located in C:\Temp\icm_ <database name=""><schema version="">.</schema></database>
	For example, C:\Temp\icm_sideA127.
Release	8.0(1)
