

Uploading a license file can result in a warning message

Problem Summary	The user gets a warning message when uploading license files using Cisco Unified CCX Administration.
Error Message	<i>The license file, <filename>, if uploaded will change the package from <existing license package> to <new license package>. Please click OK to continue or CANCEL to abort.</i>
Possible Cause	This warning is only displayed if a user tries to upload licenses which change the existing license package of the Cisco Unified CCX cluster to a different package.
Recommended Action	The user needs to determine if he or she really wants to change the license package as described in the warning message. If yes, clicking OK will change the package. If it was a user error, clicking CANCEL will keep the license package unchanged.
Release	Release 7.0(1)
Associated CDETS #	None.
